

Summary of the main features of GVS high security storage

GVS is the international abbreviation of *Goldvorsorge*.

Buy & Sell at any time

Deposits and Withdrawals are possible at any time, from anywhere. With our GVS system of high security storage, you are therefore not tied to any location, because you enjoy worldwide flexibility. We are happy to handle your storage transactions via our web shop, by phone, by e-mail or in person at any of our GVS branches. You can make a purchase using all common payment methods and in any currency. These options are also available to you when selling.

You already own precious metals? Very good, you can also store them with us personally or by shipment. We check everything for genuineness and record your precious metals in the storage contract. This documentation is the basis for the 100% insurance.

Examples of how flexible our high security storage system is:

- You are on a business trip in Asia and want to take advantage of a surprising investment offer. We transfer the amount to your account.
- You are on safari in Africa and you lose your wallet. Within a few hours you have enough money available again via Western Union.
- Your partner has planned an extensive shopping trip. We transfer money to your credit card account to increase your shopping budget.

**Flexible power of attorney**

You can issue a power of attorney at any time. Only the people you authorize, can access your stored precious metals. If you wish to make changes, just send us a message and the power of attorney will be adjusted or cancelled. Life circumstances often change, so with GVS you have every flexibility and therefore security in every situation. Furthermore, individual agreements can be set up regarding the authorized representatives, such as:

- Two or more people can only access your stored precious metals together.
- Sale/Transfers are only possible up to a certain amount.
- Access to stored precious metals only in case of death.

Worldwide network

Your GVS storage location is part of an international network of GVS high security storage facilities. There are numerous trading hubs for precious metals around the world. GVS trades at each of these locations and has corresponding high security vaults on site.

The great advantage with these trading hubs is that precious metals can be moved from one location to the next in a very short time. Every GVS customer thus has "Real Security". If the situation in a country would develop unfavorably for precious metals, we will contact you immediately to arrange another GVS storage location for you. Within our network, a relocation of your metals can be arranged at any time.

Due to our international trading activities, you can buy and sell at any GVS storage location without additional transportation/insurance costs.

Tax-free storage and tax-free profits

In most GVS storage locations it is also possible to store silver, platinum and palladium tax free. Many of our customers also have multiple storage accounts as they offer specific advantages, such as a storage for gold in Vienna and a storage for silver in Singapore.

Also take advantage of the special benefit that only precious metals have. After a holding period of one year, all profits are tax-free.

Market updates, newsletter & videos from Goldvorsorge Chief Economist Thomas Bachheimer

Goldvorsorge Chief Economist, Thomas Bachheimer, operates the largest german information platform to provide free opinions and information easily and free of charge.

The GVS financial congress took place recently. Presentations on interesting topics such as inflation and current outlook can now be accessed [online](#).

Many years of experience

GVS has been active in the precious metals industry for over 20 years and is one of the largest precious metals houses. All GVS companies are 100% bank-independent and debt-free. This unique selling proposition guarantees "Real Security" to all customers.

GVS is the official distributor of the world's leading mints. A detailed list can be found in our web shop under the heading [References](#). GVS invests all revenues from trade immediately back into precious metals and does not accumulate it as cash. Any fiat currency is immediately converted back into gold and silver. Just like any GVS storage customer, we ourselves only ever want to own precious metals. "Real Security" always takes precedence.

Confidentiality, no registers

You always remain the owner of the precious metals in custody and are subject to strict confidentiality. We do not share your information with anyone. We are 100% bank independent and do not report to the safe deposit register, or any other asset registers. Your data will always be treated 100% confidential.

Furthermore, there is no record of your stored precious metals saved online. Therefore you are always protected from hackers, unsafe data banks and WLAN scans. Your precious metals are always exactly noted on the storage contract. You can request this overview at any time.

Contrary to the usual annual inspection, the GVS high-security storage facilities are subjected to a comprehensive storage inspection twice a year. This ensures that all stored precious metals are always physically present in their entirety. It is also ensured that they are not pledged in any other way. The corresponding [audit reports](#) can be found in our web shop under the respective storage location. The auditor will also happily issue an individual report for your storage.

International web stores

GVS operates numerous web shops in different countries, languages and currencies. With your e-mail address and password you can buy and sell in any of these online stores. Furthermore, you can send us encrypted (256Bit) messages to, for example, change the power of attorney on your GVS storage contract.
